SUMMARY

A fresh graduate from Prakarya Internasional Vocational School majoring in Software and Game Development with a strong interest in Frontend Development. Experienced as a Frontend Developer intern for 5 months at PT. Walden Global Service, developing an employee leave management application, and awarded 2nd Place in a Web Development competition at Universitas Komputer Indonesia. Proficient in using Next.js and TypeScript to build responsive, well-structured, and user-oriented interfaces, with a strong commitment to continuous learning and professional growth in a professional environment.

PROFESSIONAL EXPERIENCE

Frontend Developer Internship | 2025
PT. Walden Global Service

- Developed a responsive employee leave management web application, improving the efficiency of leave request and approval processes.
- Actively collaborated with designers, backend developers, and project stakeholders to deliver features focused on user needs and scalability.
- Implemented modern frontend architecture using Next.js, Tailwind CSS, and TypeScript to produce well-structured, maintainable, and high-performance code.
- Integrated real APIs, managed application state, and optimized data rendering processes to enhance overall application performance.
- Contributed to debugging, testing, and continuous improvements of the application's interface and functionality.
